

SYSTEM AND METHOD FOR PROJECT
MANAGEMENT AND ASSESSMENT

ABSTRACT OF THE DISCLOSURE

5 The present invention provides a system (100) for
monitoring and assessing the performance of a project,
which system includes a computer (120) and a software
program associated with the computer (120), with the
software program and computer (120) operable in combination
10 to receive project task data and earned value information
from a project management software file, determine cost
depletion date information, and graphically displaying the
cost depletion date information. The present invention
also provides a method for monitoring and assessing the
15 performance of a project, which method includes obtaining
the task data and earned value information from a project
management software file; determining cost depletion date
information; and displaying cost depletion date
information.
